HYGIENE/INFECTION CONTROL	64

REPORTING ACCIDENTS AND RECORD KEEPING	65
Statutory requirements	65-66
What accidents to employees do LEAs and/or schools need to report?	67-69
How should schools report them?	70
What about pupils and other people who are not at work?	71-72
How do I decide whether an accident "arises out of or in connection with work"?	73
Record keeping	74
Statutory accident records	75
School's central record	76-79
OTHER USEFUL GUIDANCE	ANNEX A
USEFUL CONTACTS	ANNEX B

INTRODUCTION

- 1 First aid can save lives and prevent minor injuries becoming major ones. Under health and safety legislation employers have to ensure that there are adequate and appropriate equipment and facilities for providing first aid in the workplace.
- 2 It is for schools and Local Education Authorities (LEAs) to develop their own policies and procedures, based on an assessment of local need. Most schools will already have first-aid arrangements in place, and this guidance draws on existing good practice. It provides advice for schools on drawing up first-aid policies and ensuring that they are meeting their statutory duties. In particular, it includes a checklist of issues which schools may find helpful when undertaking a risk assessment, and also lists the items which should be in a standard first-aid kit.
- 3 The guidance reflects extensive consultation with the teacher unions, LEAs, health services and voluntary organisations. We greatly appreciate the assistance of all those who contributed to the consultation.
- 4 The guidance does not constitute an authoritative legal interpretation of the provisions of any enactments or regulations or the Common Law; that is exclusively a matter for the Courts.
- 5 **The minimum first-aid provision is:**
 - ▼ a suitably stocked first-aid container (see paragraphs 56 - 59);
 - ▼ an appointed person to take charge of first-aid arrangements (see paragraphs 21 - 23);
 - ▼ information for employees on first-aid arrangements (see paragraphs 30 - 33).
- 6 **This minimum provision must be supplemented with a risk assessment to determine any additional provision.**

- 7 **First-aid provision must be available at all times while people are on school premises, and also off the premises whilst on school visits.**

FIRST AID IN SCHOOLS - WHO IS RESPONSIBLE?

The Employer

- 8 Health and safety legislation places duties on employers for the health and safety of their employees and anyone else on the premises. In schools this includes responsibility for the head teacher and teachers, non-teaching staff, pupils and visitors (including contractors). Who the employer is depends on the type of school. For example:
 - ▼ the LEA is the employer in county, controlled and special agreement schools, and in pupil referral units;
 - ▼ the governing body is the employer in city technology colleges, voluntary-aided, non-maintained special, grant-maintained and grant-maintained special schools;
 - ▼ the owner or the trustees are the employers in some independent schools.
- 9 The employer is responsible, under the Health and Safety at Work etc Act 1974 (HSWA), for making sure that a school has a health and safety policy. This should include arrangements for first aid, based on a risk assessment of the school, and should cover:
 - ▼ numbers of first aiders/appointed persons;
 - ▼ numbers and locations of first-aid containers;

- ▼ arrangements for off-site activities/trips;
 - ▼ out of school hours arrangements eg lettings, parents evenings.
- 10** The employer should also make sure that their insurance arrangements provide full cover for claims arising from actions of staff acting within the scope of their employment. It is the employer's responsibility to make sure that the statutory requirements for provision of first aiders are met, that appropriate training is provided and that correct procedures are followed. The employer should be satisfied that any training has given staff sufficient understanding, confidence and expertise. (More information is given in the section on Insurance, see paragraphs 34-35.)
- 11** For more information on health and safety legislation, see Annex A which lists other relevant publications/information sources.

The Local Education Authority

- 12** In county, controlled and special agreement schools the LEA, as the employer, is primarily responsible for health and safety matters, with managers and staff also having responsibilities.
- 13** To comply with their health and safety obligations, the LEA should provide a policy statement and guidance on good practice to help county and controlled schools draw up their own health and safety arrangements, including first aid. County and controlled schools should have regard to the LEA's policy and guidance.

The Governing Body

- 14** Where the governing body is the employer it has responsibility for health and safety matters within the school, with managers and staff also having responsibilities.

- 15** The governing body are required to develop policies to cover their own school. This should be based on a suitable and sufficient risk assessment carried out by a competent person. The governing body has general responsibility for all the school's policies, even when it is not the employer. In county and controlled schools the governing body should follow the health and safety policies and procedures produced by the LEA as the employer. In practice, most of the day to day functions of managing health and safety are delegated to the head teacher.

The Head Teacher

- 16** The head teacher is responsible for putting the governing body's policy into practice and for developing detailed procedures. The head teacher should also make sure that parents are aware of the school's health and safety policy, including arrangements for first aid.

Teachers and other school staff

- 17** Teachers' conditions of employment do not include giving first aid, although any member of staff may volunteer to undertake these tasks. Teachers and other staff in charge of pupils are expected to use their best endeavours at all times, particularly in emergencies, to secure the welfare of the pupils at the school in the same way that parents might be expected to act towards their children. In general, the consequences of taking no action are likely to be more serious than those of trying to assist in an emergency.
- 18** The employer must arrange adequate and appropriate training and guidance for staff who volunteer to be first aiders/appointed persons. The employer must ensure that there are enough trained staff to meet the statutory requirements and assessed needs, allowing for staff on annual/sick leave or off-site.

WHAT ARE A FIRST AIDER'S MAIN DUTIES?

- 19 First aiders must complete a training course approved by the Health and Safety Executive (HSE).
- 20 At school, the main duties of a first aider are to:
 - ▼ give immediate help to casualties with common injuries or illnesses and those arising from specific hazards at school;
 - ▼ when necessary, ensure that an ambulance or other professional medical help is called.

WHAT IS AN APPOINTED PERSON?

- 21 An appointed person is someone who:
 - ▼ takes charge when someone is injured or becomes ill;
 - ▼ looks after the first-aid equipment eg restocking the first-aid container;
 - ▼ ensures that an ambulance or other professional medical help is summoned when appropriate.
- 22 Appointed persons are **not** first aiders. They should **not** give first aid treatment for which they have not been trained. However, it is good practice to ensure that appointed persons have emergency first aid training/refresher training, as appropriate. These courses do not require HSE approval. They normally last four hours and cover the following topics:
 - ▼ what to do in an emergency;
 - ▼ cardiopulmonary resuscitation;
 - ▼ first aid for the unconscious casualty;
 - ▼ first aid for the wounded or bleeding.

- 23 Emergency first-aid training should help an appointed person cope with an emergency and improve their competence and confidence.

FIRST AID - WHAT DO SCHOOLS NEED TO DO?

- 24 **The Health and Safety (First-Aid) Regulations 1981 set out what employers have to do.**
- 25 Employers must provide adequate and appropriate equipment, facilities and qualified first-aid personnel.
- 26 The Regulations do not oblige employers to provide first aid for anyone other than their own staff, but employers do have health and safety responsibilities towards non-employees. The Health and Safety Commission (HSC) guidance recommends that organisations, such as schools, which provide a service for others should include them in their risk assessments and provide for them. **In the light of their legal responsibilities for those in their care, schools should consider carefully the likely risks to pupils and visitors, and make allowance for them when drawing up policies and deciding on the numbers of first-aid personnel.**
- 27 Where first aid is provided for staff and pupils, schools should ensure that:
 - ▼ provision for employees does not fall below the required standard;
 - ▼ provision for pupils and others complies with other relevant legislation and guidance.

Assessment of need

- 28 The Management of Health and Safety at Work Regulations 1992 require employers to make a suitable and sufficient assessment of the risks to the health and safety of their employees at work,

and others who may be affected by their undertaking, to identify what measures they need to take to prevent or control these risks.

Reassessment of first-aid provision

- 29** The governing body and/or head teacher should regularly review the school's first-aid needs (at least annually), and particularly after any changes, to ensure the provision is adequate. Where minimum numbers of trained first aiders are set, these should be monitored to ensure that these standards are being met.

Providing information

- 30** The employer or the manager with the delegated function (usually the head teacher) must inform all staff (including those with reading and language difficulties) of the first-aid arrangements. This should include the location of equipment, facilities and first-aid personnel, and the procedures for monitoring and reviewing the school's first-aid needs.
- 31** A simple method of keeping staff and pupils informed is by displaying first-aid notices in staff/common rooms. The information should be clear and easily understood.
- 32** Notices must be displayed in a prominent place, preferably at least one in each building if the school is on several sites.
- 33** Including first-aid information in induction programmes will help ensure that new staff and pupils are told about the first-aid arrangements. It is good practice to include such information in a staff handbook.

Insurance

- 34** **In the event of a claim alleging negligence by a member of the school staff, action is likely to be taken against the employer rather than**

the employee. Employers should make sure that their insurance arrangements provide full cover for claims arising from actions of staff acting within the scope of their employment. Some LEAs provide explicit reassurance to staff that those in county and controlled schools who volunteer to assist with any form of medical procedure are acting within the scope of their employment and are indemnified.

- 35** County and controlled schools should consult their LEA about insurance arrangements.

RISK ASSESSMENT OF FIRST-AID NEEDS - WHAT SHOULD SCHOOLS CONSIDER?

- 36** **Schools normally include staff, pupils and visitors when carrying out risk assessments for first-aid needs.**
- 37** County and controlled schools should check their LEA's procedures.

Points to consider:

What size is the school and is it on split sites and/or levels?

- 38** The governing body/head teacher need to consider additional first aid provision if there is more than one building. They should consider how many first-aid personnel are needed to provide adequate cover on each floor on a split-level site and outlying buildings, and on each site of a split-site school.

Location of school

- 39** Is it remote from emergency services? It is good practice to inform the local emergency services, in writing, of the school's location (giving Ordinance Survey grid references, if necessary) and any

particular circumstances that may affect access to the school. If the school has more than one entrance, emergency services should be given clear instructions on where or to whom they should report.

Are there any specific hazards or risks on the site?

- 40 For example, hazardous substances, dangerous tools and machinery. Temporary hazards, such as building or maintenance work, should also be considered and suitable short-term measures put in place.

Specific needs

- 41 Are there staff or pupils with special health needs or disabilities? What age range does the school cater for? Different first-aid procedures may apply to pupils in primary and secondary schools. For example, the age of pupils may affect the type of first-aid procedures required, such as resuscitation techniques. First-aid training organisations can provide advice on training for first-aid personnel in schools. See Annex B for contact addresses.

Accident statistics

- 42 Accident statistics can indicate the most common injuries, times, locations and activities at a particular site. These can be a useful tool in risk assessment, highlighting areas to concentrate on and tailor first-aid provision to.

How many first-aid personnel are required?

- 43 There are no rules on exact numbers. Employers have to make a judgement based on their own circumstances and a suitable and sufficient risk assessment. **Governing bodies/head teachers should consider the likely risks to pupils and visitors, as well as employees,**

when drawing up policies and deciding on the numbers of first-aid personnel.

- 44 County and controlled schools should have regard to their LEA's policy and advice.
- 45 The HSC provide guidance on numbers of first-aid personnel based on employee numbers. As a general guide, they recommend that:
- ▼ a lower risk place of work (eg shops, offices, libraries), with fifty to one hundred employees, should consider having at least one first aider;
 - ▼ a medium risk place of work (eg light engineering and assembly work, food processing) with twenty to one hundred employees, should consider having at least one first aider for every fifty employees (or part thereof).
- 46 Schools will generally fall into the lower risk category, but some schools or areas of activity may fall into the medium risk category. Schools should base their provision on the results of their risk assessment. If there are parts of the school where different levels of risk can be identified, the employer should consider the need to make different levels of provision in different areas/departments. When considering how many first-aid personnel are required, the governing body/head teacher should also consider:
- ▼ adequate provision for lunchtimes and breaks. It is good practice to encourage lunchtime supervisors to have first-aid training;
 - ▼ adequate provision for leave and in case of absences;
 - ▼ first-aid provision for off-site activities ie school trips. If a first-aider accompanies pupils off-site, will there be adequate first-aid provision in the school?
 - ▼ adequate provision for practical departments, such as science, technology, home economics, physical education;

- ▼ adequate provision for out of hours activities eg sports activities, clubs;
- ▼ any agreements with contractors (eg school meals) on joint provision for first aid for their employees;
- ▼ adequate provision for trainees working on site. They have the same status as staff for the purposes of health and safety legislation.

Selection of first aiders

47 Unless first-aid cover is part of a member of staff's contract of employment, people who agree to become first-aiders do so on a **voluntary basis**. When selecting first aiders, governing bodies/head teachers should consider the individual's:

- ▼ reliability and communication skills;
- ▼ aptitude and ability to absorb new knowledge and learn new skills;
- ▼ ability to cope with stressful and physically demanding emergency procedures;
- ▼ normal duties. A first aider must be able to leave to go immediately to an emergency.

Contacting first-aid personnel

48 Do all school staff know how to contact a first aider? Are there agreed procedures in place if an emergency occurs in an isolated area eg on the playing field? Governing bodies/head teachers should consider how best to let everyone know the school's first-aid arrangements. Procedures need to be in place that are known, understood and accepted by all. Information should be given about the location of first-aid equipment, facilities and personnel. First-aid notices should be displayed which are clear and easily understood by all.

Is it sufficient only to have an appointed person?

- 49** The governing body or head teacher may decide, on the basis of the risk assessment of their first-aid needs, that a first aider is not necessary, although this is unusual. The minimum requirement is that an appointed person must take charge of the first-aid arrangements. The school's assessment should identify the number of appointed persons needed. Arrangements should be made to ensure that this cover is available at all times while people are on school premises.
- 50** County and controlled schools should observe their LEA's minimum requirements.

QUALIFICATIONS AND TRAINING

- 51** A first aider must hold a valid certificate of competence, issued by an organisation whose training and qualifications are approved by the HSE. Information on local organisations offering training is available from HSE offices and from some of the organisations listed in Annex B. Local colleges may also offer first-aid training.
- 52** Training courses cover a range of first aid competences. However, **standard first aid at work training courses do not include resuscitation procedures for children**. The employer should arrange appropriate training for their first-aid personnel. Training organisations will often tailor courses specifically to schools' needs. It is helpful to let the training organisation know in advance of any particular areas that should be covered.
- 53** First aid at work certificates are only valid for **three years**. Employers should arrange refresher training and retesting of competence before certificates expire. If a certificate expires, the individual will have to undertake another full course of training to become a first aider. However, employers can

arrange for first aiders to attend a refresher course up to three months before the expiry date of their certificate. The new certificate takes effect from the date of expiry. Schools should keep a record of first aiders and certification dates.

- 54 The HSE also produce guidance on the standards and requirements for approval of training including a list of standard first aid competences (see Annex A).

FIRST-AID MATERIALS, EQUIPMENT AND FIRST-AID FACILITIES

- 55 Employers must provide the proper materials, equipment and facilities at all times. First-aid equipment must be clearly labelled and easily accessible.

How many first-aid containers should a school have?

- 56 Every employer should provide at least one fully stocked first-aid container for each site. The assessment of a school's first-aid needs should include the number of first-aid containers. Additional first-aid containers will be needed for split-sites/levels, distant sports fields or playgrounds, any other high risk areas and any off-site activities. **All first-aid containers must be marked with a white cross on a green background.**
- 57 The siting of first-aid boxes is a crucial element in the school's policy and should be given careful consideration. If possible, first-aid containers should be kept near to hand washing facilities.

Contents of a first-aid container

- 58 There is no mandatory list of items for a first-aid container. However, the HSE recommend that,

where there is no special risk identified, a **minimum** provision of first-aid items would be:

- ▼ a leaflet giving general advice on first aid (see list of publications in Annex A);
- ▼ 20 individually wrapped sterile adhesive dressings (assorted sizes);
- ▼ two sterile eye pads;
- ▼ four individually wrapped triangular bandages (preferably sterile);
- ▼ six safety pins;
- ▼ six medium sized (approximately 12cm x 12cm) individually wrapped sterile unmedicated wound dressings;
- ▼ two large (approximately 18cm x 18cm) sterile individually wrapped unmedicated wound dressings;
- ▼ one pair of disposable gloves.

Equivalent or additional items are acceptable.

- 59 A school's first-aid procedures should identify the person responsible for examining the contents of first-aid containers. These should be checked frequently and restocked as soon as possible after use. There should be extra stock in the school. Items should be discarded safely after the expiry date has passed. Some booklets giving further information on the contents of first-aid containers are listed at Annex A.

Travelling first-aid containers

- 60 Before undertaking any off-site activities, the headteacher should assess what level of first-aid provision is needed. The HSE recommend that, where there is no special risk identified, a **minimum** stock of first-aid items for travelling first-aid containers is:

- ▼ a leaflet giving general advice on first aid. See list of publications in Annex A;
- ▼ six individually wrapped sterile adhesive dressings;
- ▼ one large sterile unmedicated wound dressing - approximately 18cm x 18cm;
- ▼ two triangular bandages;
- ▼ two safety pins;
- ▼ individually wrapped moist cleansing wipes;
- ▼ one pair of disposable gloves.

Equivalent or additional items are acceptable. Additional items may be necessary for specialised activities.

Public Service Vehicles

- 61** Transport Regulations require that all minibuses and public service vehicles used either as an express carriage or contract carriage have on board a first-aid container with the following items:
- ▼ ten antiseptic wipes, foil packaged;
 - ▼ one conforming disposable bandage (not less than 7.5 cms wide);
 - ▼ two triangular bandages;
 - ▼ one packet of 24 assorted adhesive dressings;
 - ▼ three large sterile unmedicated ambulance dressings (not less than 15 cm x 20 cm);
 - ▼ two sterile eye pads, with attachments;
 - ▼ twelve assorted safety pins;
 - ▼ one pair of rustless blunt-ended scissors.

- 62** This first-aid container shall be:
- ▼ maintained in a good condition;
 - ▼ suitable for the purpose of keeping the items referred to above in good condition;
 - ▼ readily available for use; and
 - ▼ prominently marked as a first-aid container.

First-aid accommodation

- 63** Employers must provide suitable and sufficient accommodation for first aid according to the assessment of first-aid needs identified. The Education (School Premises) Regulations 1996 require every school to have a suitable room that can be used for medical or dental treatment when required, and for the care of pupils during school hours. The area, which must contain a washbasin and be reasonably near to a WC, need not be used solely for medical purposes, but it should be appropriate for that purpose and readily available for use when needed. Schools should consider using this room for first aid. However, first-aid facilities may need to be made available quickly. Organisations such as HSE provide detailed advice on first-aid rooms (see Annex A).

HYGIENE/INFECTION CONTROL

- 64** All staff should take precautions to avoid infection and must follow basic hygiene procedures. Staff should have access to single-use disposable gloves and hand washing facilities, and should take care when dealing with blood or other body fluids and disposing of dressings or equipment. Further guidance is available in the DfEE publication *HIV and AIDS: A Guide for the Education Service* (see Annex A). LEAs may have produced guidance on this issue, which county and controlled schools should follow.

REPORTING ACCIDENTS AND RECORD KEEPING

Statutory requirements

- 65** Under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1995 (RIDDOR) some accidents must be reported to the HSE.
- 66** The employer must keep a record of any reportable injury, disease or dangerous occurrence. This must include: the date and method of reporting; the date, time and place of the event; personal details of those involved and a brief description of the nature of the event or disease. This record can be combined with other accident records (see paragraphs 75-78).

What accidents to employees do LEAs and/or schools need to report?

- 67** County and controlled schools should follow their LEA's procedures. Some LEAs may require serious/significant accidents to be reported centrally for insurance/statistical purposes or as part of their RIDDOR arrangements.
- 68** The following accidents must be reported to HSE if they injure either the school's employees during an activity connected with work, or self-employed people while working on the premises:
- ▼ accidents resulting in death or major injury (including as a result of physical violence);
 - ▼ accidents which prevent the injured person from doing their normal work for more than three days (including acts of physical violence).
- 69** For definitions of major injuries, dangerous occurrences and reportable diseases see HSC/E guidance on RIDDOR 1995, and information on Reporting School Accidents (Annex A).

How should schools report them?

- 70** HSE must be notified of **fatal and major injuries and dangerous occurrences without delay** (eg by telephone). This must be followed up within ten days with a written report on Form 2508. Other reportable accidents do not need immediate notification, but they must be reported to HSE within ten days on Form 2508.

What about pupils and other people who are not at work?

- 71** An accident that happens to pupils or visitors must be reported to the HSE on Form 2508 if:
- ▼ the person involved is killed or is taken from the site of the accident to hospital; **and**
 - ▼ the accident arises out of or in connection with work.
- 72** Like fatal and major injuries to employees or dangerous occurrences, these accidents must be notified to HSE without delay and followed up in writing within ten days on Form 2508.

How do I decide whether an accident "arises out of or in connection with work"?

- 73** In HSE's view an accident must be reported if it relates to:
- ▼ any school activity, both on or off the premises;
 - ▼ the way a school activity has been organised and managed (eg the supervision of a field trip);
 - ▼ equipment, machinery or substances;
 - ▼ the design or condition of the premises.

Record keeping

- 74 County and controlled schools should follow their LEA's procedures.

Statutory accident records

- 75 Employers with 10 or more employees must keep readily accessible accident records, either in written or electronic form. These records must be kept for **a minimum of 3 years**. (See Annex A for where to obtain further guidance.)

School's central record

- 76 This record is not the same as the Department of Social Security BI510 statutory accident book (see paragraph 75) or the RIDDOR record (see paragraph 65), although the three might be combined, providing all the information required by the legislation is included in the replacement record.

- 77 Schools should keep a record of any first aid treatment given by first aiders and appointed persons. This should include:

- ▼ the date, time and place of incident;
- ▼ the name (and class) of the injured or ill person;
- ▼ details of the injury/illness and what first aid was given;
- ▼ what happened to the person immediately afterwards (for example went home, resumed normal duties, went back to class, went to hospital);
- ▼ name and signature of the first aider or person dealing with the incident.

- 78 The information in the record book can:

- ▼ help the school identify accident trends and possible areas for improvement in the control of health and safety risks;
 - ▼ be used for reference in future first-aid needs assessments;
 - ▼ be helpful for insurance and investigative purposes.
- 79 In an emergency, the headteacher/teacher in charge should have procedures for contacting the child's parent/guardian/named contact as soon as possible. It is also good practice to report all serious or significant incidents to the parents eg by sending a letter home with the child, or telephoning the parents.
